

PUBLIC NOTICE

The Hamlet has recently taken delivery of 200 garbage dumpsters. Municipal Works Crews will be placing these dumpsters throughout the community over the next couple of weeks.

These units will be replacing the old barrels that were used for garbage collection as well as a number of garbage boxes that will either be removed or placed elsewhere within town.

These dumpsters will be used in high density areas and will be positioned to accommodate multiple residences. This means that you may be sharing a single unit with a number of your neighbors. This also will mean that you may have to walk a few additional feet to drop your waste in the dumpsters. This will cut down on the number of stops the garbage truck will have to make.

These dumpsters in addition to the new garbage truck and new fencing around the dumpsite represent an investment by Council this year of over \$750,000.00 towards improving waste collection and waste management on your behalf.

If you have any questions or concerns, please contact the SAO at 645-2895 or by email sao@rankininlet.ca
