Operation NANOOK-NUNALIVUT Activities in the Arctic

February 28, 2023 – Rankin Inlet, Nunavut

Joint Task Force (North) (JTFN) will conduct Operation NANOOK-NUNALIVUT (Op NA-NU) from March 1 – 20, 2023, in and around Rankin Inlet, Nunavut.

Residents may notice an increase in military air and ground traffic in the region during this time, as Canadian Armed Forces (CAF) personnel and equipment are transported and employed in various communities.

Operation NANOOK-NUNALIVUT is an annual winter operation which demonstrates the Canadian Armed Forces' ability to project and sustain forces in the Arctic while increasing interoperability with international Allies.

As with all Northern operations, host communities are involved in the planning process to ensure fair and equitable stewardship of the land. JTFN plans its operations to minimize its impact on the environment. Every effort will be made to minimize disruption to residents.
